

For those of you reviewing this particular flow chart, please take into account there are aspects of this flow chart that may not be impacted by the Coroner's inquest ordinance itself. An example I would give you is the initial response for investigation on the use of force and the initial decision by the District Attorney to proceed with criminal charges or not, as well as the conclusion drawn by the District Attorney after the Coroner's inquest process. Specifically under statute these may not be addressed, but for the purposes of this flow chart they should be. Again for this is a recommendation for discussion, not necessarily a motion on my part for approval.
